

Information Bulletin No: 1601

15 February 2016

Announcement : MSDS for UNIPHOS gas detector tubes.

UNIPHOS gas detector tubes are considered to be an “article” as defined in 29CFR 1910.1200(c) and are therefore exempt from MSDS (Material Safety Data Sheet) requirements in the Hazardous Communication Standards.

UNIPHOS detector tubes are made in specific design or shape during manufacture; have end use function(s) dependent in whole or in part during end use. Under normal conditions of use, these tubes does not release any hazardous chemicals and does not pose physical hazard or health risk to the end user. Thus MSDS is not required for UNIPHOS gas detector tubes.

For disposal of used UNIPHOS gas detector tubes, refer detector tube instruction sheet enclosed with detector tubes in the tube packing.

For more information on this bulletin, please contact UNIPHOS.
